

Maths Big Idea:

*How can knowing number bonds to 20 help me with adding and subtracting problems?*

*These are our steps we need to take in order to achieve the big idea:*

- How many adding combinations can I make with the number 20?
- How can adding facts to 10 help us with adding facts to 20?
- How can doubling facts help me with subtracting?
- When could I use my number facts to help me?
