

Our big idea is:

How can I show 3 digit numbers using base 10 equipment?

*These are our steps we need to take in order to achieve the big idea:*

- How can I build a 2 digit number?
- What is the link between 100 and groups of 10?
- How can base 10 help me with my maths work?
- How can base 10 help me to show hundreds, tens and units?
- When would I need to exchange or regroup base 10?
